

acomba go

Why did the Val-Neigette de Rimouski Golf Club choose Acoma GO?

William D'Astous, assistant manager and co-owner

Thanks to the service that Dave provided us, the transition to **Acoma GO** was quicker and easier than we expected. We now have much fewer billing errors, our inventory is much easier to manage and we have access to more reports than ever.

When the Val-Neigette Golf Club had software problems in the middle of the season, the owner was reluctant to change systems. Today, he has absolutely no regrets about his decision. Just over a month after having signed, Acoma GO was implemented in the club, its employees were trained and the new system was fully operational. No more problems!

Challenges

- Hard to get service and support from the old software supplier.
- Problems with the point of sale software.

Solution: Acoma GO

Acoma GO successfully implemented in the middle of the season. Access to new capabilities and functionalities which make management of the club much easier.

Tons of reports

"The multitude of reports we can produce provides us with much clearer figures for our sales and patronage. This helps to plan more efficiently for the new season. Our analyst is thrilled."

Ease and efficiency

"**Acoma GO** is really easy to use. The software is very complete, very visual. It's much easier to work more efficiently!"

More efficient management

"So many things have improved: it's much easier to add items in the inventory, the possibility for members to pay online, better management of green fees, the possibility of switching from invoicing to reservations in a single software. It's a game changer!"

Do you want to do like the Val-Neigette de Rimouski Golf Club and obtain the best management tools?

Call us to discover how Acoma GO can facilitate your club's daily operations: member management, tee off management, manage your pro shop and much more.
